Phan My Anh Nguyen

Boehringer Ingelheim

03/2026 – now

Intern - Quality Management System Design

- Analyzed and restructured existing intranet pages for the Quality Management System (QMS) portal.
- Planned and conducted a UX survey involving approximately 200 participants to gather user insights and requirements.
- Designed and implemented an intuitive, user-centered QMS portal experience.
- Developed standardized SharePoint templates for QMS-related systems.
- Created presentation, flyer, and newsletter templates to support effective internal communication.

Volkswagen AG

09/2025 – 03/2026

Intern - Development of an Internal Communication Platform

- Contributed to the development of the new internal communication platform (Entgelt-Wiki).
- Analyzed the performance and user engagement of the legacy website to identify improvement opportunities.
- Planned and conducted a user survey involving around 100 participants to understand user behavior and requirements.
- Implemented design solutions and prepared supporting documentation for successful deployment.
- Managed content creation and publication for both the new platform and the Volkswagen intranet.

encoway GmbH

02/2024 – 04/2025

Working Student UX/UI Design

- Analysis of competitor's UX/UI websites to identify strengths and optimization potential.
- Conducting expert reviews for the company's own websites with actionable recommendations.
- Creating wireframes and prototypes for developing new functions and features.
- Creating UX/UI communication materials (infographics, UX posters, UI graphics).
- Developing and designing a SharePoint page for the UX/UI team.

Siemens AG

08/2022 – 02/2023

Working Student

- Management, classification, and organization of documents in accordance with requirements.
- Data entry and digitization of paper documents into the SAP system, ensuring accuracy and completeness.
- Support in maintaining and optimizing archiving processes.

KUKA AG

04/2022 – 06/2022

Intern: UX Design

- Prototyping with Axure 9 to optimize the handheld device for robot operation.
- Research on keyboards used across different languages.
- Support in developing UX patterns and design components.
